

Recover in the comfort of your own home, surrounded by your loved ones and the familiar environment you cherish.

**Program provides 30 days of
Access to the SENA team**

Healing at Home

sena

IN-HOME VISITS AND TELEHEALTH

Our nurses will visit you in your home, and our providers will conduct a telehealth upon your return from the hospital.

REMOTE MONITORING

You will be given a kit with Remote Patient Monitoring (RPM) devices upon leaving the hospital. This kit allows our care team to remotely monitor your health status for any changes. A Personal Emergency Response System (PERS) will be provided upon need.

24/7/365 CARE TEAM

Our Health Coordinators are available 24/7/365 to provide assistance at home via phone, text, or email. They will help you obtain any community resources to make sure all of your health needs are met and update your Primary Care Provider and specialists about your results for your follow-up office visit.
